

Charville Primary Academy Trust continues to drive up standards, promote self-improvement and create learning environments which value its children and are also valued by them.

Learners are actively encouraged to take responsibility for themselves and their learning; parents, guardians and carers become active partners in the education of their children. Beyond this, our school currently seeks to be well connected to the community they serve, by going the extra mile in offering additional services and opportunities beyond the school day and during traditional holiday periods.

The school prides itself on providing high quality educational provision with each individual learner being known, happy, supported and challenged to achieve their full potential through a genuine passion for learning. Our school offers a caring community where children develop as independent, confident and capable learners.

With this in mind, positive relationships and outstanding behaviour is promoted by ensuring our 11 values are followed and demonstrated by all adults and children so that everyone works productively together, sharing a common sense of purpose; each achieving the very best they can.
